

t.e.: classes declaration principles for the winter semester of the 2025/2026 academic year

In accordance with § 33 sec. 2 the Statute of the Polish-Japanese Academy of Information Technology, the following is ordered:

**§ 1.**

1. There will be no thesis defences or diploma examinations during the winter semester, i.e. **from September 29, 2025 to January 27, 2026**. Thus, all thesis defences and diploma examinations must be completed by **September 21, 2025**.
2. In order for the student to be admitted to the defence it is required that the programme of study, as well as the preparatory defence procedure have been completed.  
In the absence of a complete set of documents, the student's defence will not be possible.
3. Students, who have failed to defend their thesis and diploma examinations by **September 21, 2025** will not have the opportunity to do so until during the next examination session.
4. Declarations of a student's subjects of choice are requests which may be declined. The final decision on a student's classes in the new semester is made by the Dean basing on the student's academic progress.

**PRINCIPLES FOR DECLARING SUBJECT OF CHOICE**

**§ 2.**

1. The deadline for the submission of the declaration of classes of choice in the **winter semester 2025/26** (subject retakes, change of specialisation, change of mode of study etc.) is **September 15, 2025**. If the application is submitted after that date, we do not guarantee that the class of choice may be attended in the next semester.  
According to the Dean's Regulation, applications should only be submitted electronically via the [gakko.pja.edu.pl](http://gakko.pja.edu.pl) system.  
Applications submitted in a different form, i.e. on paper or sent by e-mail, will not be considered.
2. Retaking subjects under a different study mode than that the student has registered for is only allowed according to the following rules:

Student's study mode	Retake mode
Full-time studies	<ul style="list-style-type: none"><li>▪ full-time studies</li><li>▪ Internet part-time studies (not all subjects – see table)</li></ul>
Part-time studies (weekend and Internet)	<ul style="list-style-type: none"><li>▪ part-time studies (weekend and Internet); (not all subjects – see table)</li></ul>

**It is not allowed to retake full-time programme classes on a part-time programme or vice versa. I enclose the list of subject which can be completed under the ITN arrangement for full and part-time programmes.**

3. The students solely retaking subjects under the ITN mode must attend **at least 50% of the classes** in the study mode they have registered for.
4. **Specialisation may not be changed while a semester is in progress.** Applications for change of specialisation must be submitted by **September 15, 2025**. The application must be appended with the relevant Supervisor's written approval of the student's admission to the requested specialisation class, as well as a signature of the Supervisor of the previous specialisation, confirming his knowledge of the student's resignation. We do not guarantee that all the requests for a change of specialisation will be granted. This will depend on the number of candidates who have enrolled for this specialisation.
5. **In the case of declaring a PRO or SEM subject to be repeated,** the student must obtain the promoter's consent, including confirmation of the degree of progression of the work. **Applications for ITNs made without obtaining the promoter's consent, in accordance with the applicable template, will not be considered.**
6. **Repeating a PRO or SEM course without student rights** is only possible for 1 semester. Submission of the application requires the promoter's approval, including the progress of the thesis. **Applications for ITNs submitted without the promoter's approval, following the applicable template, will not be considered.**
7. Students who want to return to a full semester after the ITN semester or after the Dean's leave, are required to submit an appropriate application in the application system [gakko.pja.edu.pl](http://gakko.pja.edu.pl)
8. **Students are kindly requested to carefully consider the subjects they declare for retake.** The principles for resignation from the declared ITNs are laid down in the Regulation of the Rector of February 23, 2009 which stipulates that where a resignation is submitted within 3 weeks of the first day of a semester, the student must pay a resignation fee, and the grade obtained is not included in the records. After this date, the subject selected for retake is deemed as compulsory for the student in that semester, which entails the obligation to pay for it and to pass it. Students who have failed to pass a subject and those who have failed to turn up for the final test will obtain the failing ("2") grade in the official list.
9. The University reserves the right not to launch an elective subject if there are not enough students enrolled in it: in first-cycle studies (required group of 14 students); at second-cycle studies (at least 10 people if the subject is not recommended by the head of specialization).
10. Resignation from an elective subject in full-time studies may be submitted no later than within the first two weeks of the semester or, in the case of part-time studies, immediately after the second session.
11. **Examinations must be taken exclusively in the mode for which the student registered.** In exceptional cases, the student may take an examination under a different mode, provided that both teachers involved agree (i.e. the person teaching the subject in the student's current mode and the teacher responsible for the examination).
12. Students who, after completing the entire study program, by the end of the summer semester, **did not complete the first or second cycle studies (i.e. did not pass the diploma examination)** and those who did not submit an application/were not allowed to submit an application for declarations of classes in the next semester (after vacation, after ITN, no promotion) will be removed from the student list.
13. **Only one change of mode of study is possible** while completing a course within the same field of study at PJAiT.
14. Overdue (failed) subjects (classes) should be retaken in the nearest semesters when these subjects are on schedule.

15. Changing group rules:

- a) Each student enrolled for the semester is guaranteed a place in the exercise, lecture and reading group. The University reserves the right to reduce the number of groups, which may result in changes in assignments to the aforementioned groups.
- b) Changing the group is possible only in the case of collision of classes (regular and ITN groups).
- c) A request for a group change (including the proposed new group number) should be sent to the Student's Office email address ([dziekanat@pjawstok.edu.pl](mailto:dziekanat@pjawstok.edu.pl)). The change will be possible only in case of vacancies in the requested group.
- d) Any changes are possible until the end of the first week of classes.
